Your studies can demonstrate relevant coursework and knowledge to a prospective employer. Employers select people who they believe can do the job (have the right skills), want the job (have demonstrated an interest in the field) and are a personality fit for the team and organization.

What value do Psychology majors bring?

According to the Department of Psychology at Columbia, the psychology curriculum helps you to develop the following skills:

- Ability to think critically and objectively
- Ability to write clearly and effectively
- Ability to present a case convincingly
- Ability to develop creative solutions to unique situations
- Ability to utilize appropriate statistical analyses
- Ability to organize, interpret and evaluate empirical data
- Ability to use the scientific approach to evaluate problems
- Ability to act ethically in all aspects of the science and practice of psychology
- Ability to apply psychological concepts, theories, and research findings to real world problems
- Strong command of psychological science, theory, research methods, and experimental design
What if I’m an international student?

For international students at Columbia under student visas, selecting your major can play a significant role if you plan to work in the US after completion of your degree. Optional Practical Training is a work authorization that allows an international student to work in a job directly related to the student’s major area of study either before or after degree completion. Employer sponsored H1B Visas also have similarly strict requirements. Students that have more questions about this should visit the International Student & Scholars Office (ISSO) and view CCE’s International Students webpage at http://www.careereducation.columbia.edu/students/International-Students
